Notice period: maximum 1 month

PROFILE

Data analyst and automation developer with experience in SQL, Python, data cleaning, validation and operational reporting. Builds scheduled data retrieval and reporting solutions, translates client requirements and resolves data issues. MSc in Data Science with academic study in machine learning and visual analytics.

RELEVANT SKILLS

Data: SQL, stored procedures, Python, Pandas, SQLite, Excel, regex, ETL, data validation

Reporting: Power BI, Looker, Freshdesk dashboards, data visualization, date-based reports

Delivery: Client requirements, Power Automate, SharePoint, Power Apps, ChatGPT-assisted coding

PROFESSIONAL EXPERIENCE

Automation Solutions Developer (functional role) | LeverageAxiom Solutions Pvt. Ltd.

Chennai, India | Dec 2025 - Present

- Worked directly with the client from May 2026 to clarify requirements, propose solutions and translate business needs into applications and workflows; guided junior colleagues.
- Built a SQL stored procedure and Power Automate flow to retrieve meter readings daily at 9:00 AM, with fallback logic for missing readings.
- If no reading existed after 8:50 AM, selected the maximum reading before 8:50 AM; if unavailable, checked the previous day's raw data, then its backup data.
- Enhanced a Power Apps finance application with date-based reporting using SharePoint data and Power Automate flows for PDF generation.
- Built a Power Apps dashboard reporting task progress, overdue items, pending actions and critical delays.
- Built a SharePoint filtering tool used by colleagues to access targeted data without manually editing URLs: krishnaanalytics.in/spurl.
- Resolved production workflow failures through SharePoint data restructuring and backend cleanup; automated updates across three lists with error handling.

Data Administrator & Analyst | SPK Property Solutions

Swansea, UK | Oct 2023 - Feb 2025

- Cut booking processing from 3 minutes to 30 seconds (83%) by cleaning 3,000 rows with Python and regex, migrating data to SQLite and adding validation rules.
- Improved SQLite query performance through schema redesign and indexing; performed SQL data-quality checks, scheduled backups and recovery testing.
- Developed hourly refreshed Freshdesk dashboards tracking cleaning and maintenance ticket volumes, response times and team workload.
- Built a PDF-to-table web tool to structure pasted QuickBooks remittance data into editable tables for finance matching, removing manual transcription.

EDUCATION & EARLIER TRAINING

MSc Data Science | Swansea University, UK | Sept 2021 - Sept 2022

Academic coursework: Machine Learning, Deep Learning, Data Mining and Visual Analytics.

Dissertation: Built an interactive A-Level Maths syllabus mind-map using web-based visualization.

Bachelor of Computer Applications | DG Vaishnav College, Chennai | Jul 2016 - Apr 2019

Accenture, Chennai | Paid training for Process Associate role | Jan 2020 - Mar 2020
